Technical Skills

Programming Languages

- JavaScript
- TypeScript
- Python

Frontend

- HTML5
- CSS/SASS
- React
- Redux
- Next.js
- Redux Toolkit
- Vue.js
- Zustand
- A11y
- Adaptive design

Backend & Databases

- Node.js
- MongoDB
- Express.js
- REST API
- PostgreSQL
- Prisma
- MySQL

DevOps & Tools

- Linux
- Docker
- CI/CD
- Github Actions
- DigitalOcean
- SSH

API & Documentation

- Markdown
- JSON/YAML
- VitePress
- Swagger

Other Tools and Technologies

- GIT/Github
- Axios
- Webpack
- Parcel

Education

- Master of Telecommunication**
Odesa National Academy of
Telecommunications O.S. Popov
09/2006 - 06/2010 | Ukraine

Certificates

- Full-Stack Developer - 10/2023
- DevOps and Kubernetes - 05/2024
- Telc DTB B2 - 07/2024
- English B1 - 12/2023

Experience

Full-Stack Developer 06/2025 - Present

DoGood Impact Inc. | USA (Remote)

- Developed and optimized scalable frontend and backend components using **React**, **Next.js**, **TypeScript**, **PostgreSQL**, and **Prisma** for an international non-profit platform.
- Designed and implemented interfaces between frontend and backend to ensure consistent data structures and reliable data communication.
- Created and maintained technical project documentation (architecture, API, data flows) using **VitePress**, improving maintainability and knowledge sharing across the team.
- Automated **API documentation** by implementing **CI/CD** workflows with **GitHub Actions** and **Swagger**, reducing manual effort and increasing development efficiency.
- Developed **automation scripts** for recurring tasks (e.g., component and icon exports) to streamline the development workflow.
- Collaborated closely with frontend, backend, and design teams on the development of an **MVP**, participating in **Sprint Planning**, Refinement sessions, and **Code Reviews**.
- Continuously improved the scalability, maintainability, and reusability of the application architecture.
- Independently delivered technical solutions while ensuring the quality, reliability, and stability of the developed components.

Frontend Developer 11/2023 - 12/2023

SoftRyzen | Kyiv, Ukraine (remote)

- Developed interactive user interfaces for the website of a commercial client (SmileBar) using **React**, **Next.js**, and **Tailwind CSS**, ensuring an intuitive user experience.
- Implemented dynamic **tab components** for the Benefits and FAQ sections to improve usability and interactivity.
- Customized the **Tailwind CSS configuration** and developed reusable UI components and animations to ensure a consistent design system.
- Analyzed and resolved **cross-browser compatibility** issues to ensure consistent behavior across different browsers and devices.
- Collaborated with developers and designers in an **Agile Scrum** team using **Figma** and **Trello** to deliver project milestones on schedule.
- Independently delivered assigned frontend tasks while maintaining high code quality and meeting project requirements.

Project Experience

Portfolio - ([Website](#) | [Github](#)) 10/2024 - Present

- Developed a responsive portfolio website using **Next.js**, **React**, and **TypeScript** to showcase projects and technical skills.
- Built reusable **React** components and implemented modern animations with **Styled Components** to create a consistent and maintainable UI.
- Developed a secure contact form featuring multi-step validation, spam detection, email verification, and automated message delivery via external **REST APIs**.
- Ensured **cross-browser compatibility** while optimizing application performance and page load times across different browsers and devices.
- Deployed and continuously maintained the application on **Vercel**, including the configuration of automated deployment workflows.
- Achieved a **Lighthouse score of 100/100** in Performance, Accessibility, Best Practices, and SEO.

Technologies: Next.js, TypeScript, Styled Components, EmailJS, MailboxLayer API, Yup, Vercel, Git, GitHub

Languages

- English - Intermediate B1
- German: Upper-Intermediate B2
(Course C1.1 in progress)
- Ukrainian: Native
- Russian: Proficiency

Soft Skills

- Problem Solving
- Analytical Thinking
- Continuous Learning
- Self-Management
- Attention to Quality
- Teamwork
- Accountability

Portfolio

Car Rental - ([Website](#) | [Github](#))

09/2023 - 10/2023

- Developed a responsive **React** web application for vehicle search and reservation using a component-based architecture.
- Managed application state with **Redux Toolkit** and integrated a **REST API** using **Axios** to dynamically display and filter vehicle data.
- Implemented interactive search and filtering features, a favorites system with **Local Storage** persistence, and a modal-based vehicle details view.
- Built a responsive user interface and implemented modern animations using **Emotion** and **Framer Motion** to ensure a consistent user experience across different devices.
- Configured an automated **CI/CD** workflow with **GitHub Actions** to deploy the application to **GitHub Pages**.

Technologies: React, Redux Toolkit, React Router, Axios, Emotion, Framer Motion, GitHub Actions, GitHub Pages

Goose Track - ([Website](#) | [Github](#))

09/2023 - 10/2023

Full-Stack Team Project.

Role: Frontend Team Lead, Scrum Master, Frontend Developer.

- Developed a responsive **React** web application for personal task and calendar management with Google Authentication as part of a full-stack team project.
- Implemented core monthly calendar functionality, including the user interface, interaction logic, and state management with **Redux Toolkit**, while collaborating closely with the backend team on **REST API** integration and issue resolution.
- Led a **frontend team of 9 developers**, conducted **code reviews**, and ensured consistent development standards and code quality.
- Served as **Scrum Master**, organizing the development workflow with **Trello**, facilitating Agile ceremonies, and coordinating collaboration across the frontend team.

Technologies: React, Redux Toolkit, React Router, Axios, Trello, Git, GitHub

Phonebook - ([Website](#) | [Github](#))

07/2023 - Present

- Developed a responsive contact management web application using **React** and **Redux Toolkit** with an intuitive and user-friendly interface.
- Designed and implemented a **RESTful API** using **Node.js**, **Express**, and **MongoDB** to handle user authentication, contact management, and persistent data storage.
- Integrated the frontend with the **REST API** using **Axios** and managed application state with **Redux Toolkit**.
- Implemented **CRUD** functionality for creating, updating, deleting, and filtering contacts, while ensuring a responsive user experience across different devices.
- Deployed the backend to a **DigitalOcean** server, including server environment configuration and application deployment.

Technologies: React, Redux Toolkit, Axios, Node.js, Express, MongoDB, REST API, DigitalOcean

Further Education

Linux & Network Administration Course

01/2026 - 05/2026

PortaOne Education Center | Remote

- Linux Administration & Automation: Hands-on administration of Linux systems, user and permission management, **Bash scripting**, automation of administrative tasks, and virtual machine setup using **Oracle VirtualBox**.
- Networking: Configuration of **IP networks**, routing, **NAT**, **iptables** firewall, **FTP** servers, network traffic analysis, and troubleshooting.
- Server Administration: Installation and configuration of **Apache**, **HTTPS/SSL**, virtual hosts, and **LAMP** environments.
- Databases: Installation and administration of **MySQL**, user and permission management, database **backups**, and basic **replication** setup.
- Troubleshooting & DevOps Fundamentals: Analysis and resolution of system and network issues, with foundational knowledge of **Docker**, **Kubernetes**, and **Ansible** gained through workshops.

Full-Stack Web Development Training Program

11/2022 - 10/2023

IT-School GoIT | Kyiv, Ukraine (remote)

- Frontend & Backend Development: Practical experience developing **5 individual** and **3 team projects** using **JavaScript**, **React**, **Node.js**, and **MongoDB**.
- Agile Development & Team Leadership: Practical experience serving as **Team Lead** and **Scrum Master**, coordinating development teams of **up to 14 members**, including task distribution and sprint organization.
- Code Quality & Version Control: Practical experience conducting **code reviews**, maintaining consistent coding standards, and managing version control with **GitHub**.
- Technology Adoption & **Code Optimization**: Experience learning and applying new frameworks and libraries while continuously improving and optimizing existing applications.
